FOREMAN[®] Gym Lockers

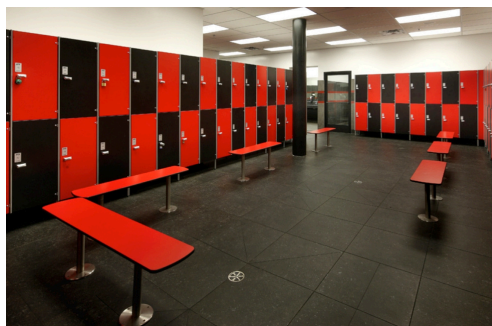

In any fitness center, the first thing gym goes typically use is a locker room locker. A gym locker room should be spacious, bright, clean, safe, and comfortable—a place where people leave the demands of everyday life behind to exercise, relax, and refresh. Because lockers are used to store personal belongings, they must be secure, and because gym lockers have such high traffic use, they must also be durable.

With over 15 years of fabrication expertise, FOREMAN[®] has mastered the art of creating lockers that meet these needs by using modern, high-quality materials alongside latest design and manufacturing technologies.

Key Features:

Solid Phenolic Material: The construction and solid phenolic material make our lockers extremely durable, ideal for high-traffic facilities like school sports complexes, martial arts studios, or youth team locker rooms.

Easy to Clean & Odor-Free: Our lockers are very easy to clean, leave no odor, are scratch and water resistant, and can be placed next to showers.

Popular Configurations:

Combination Lockers:

Available in 1-6 tier configurations, these combination designs are becoming increasingly popular. These customizable designs support ADA compliance and maximize storage, offering more options for users while optimizing space.

Low Profile Lockers:

Our 36" high console lockers are ideal for optimizing space. They can be conveniently positioned near the reception area, beneath windows, or in areas with limited vertical clearance. The console design enhances storage efficiency, making the most of compact spaces.

Z Style Signature Lockers

Our best-selling unique Z Style Lockers feature an integrated bench, providing enough space for a coat and a spacious compartment for a bag. The lower compartment is fully usable, with the bench secured onto corbels.

Open Cubbies:

Available in customizable colors, cubbies can be tailored to create a playful environment for children or to match gym branding for a cohesive look in adult spaces. These cubbies are perfect for storing personal items in kids' clubs, group exercise areas, or near pools and spas.

Customizations:

Custom Color Aluminum Profiles: Contrast and bright colors of custom-painted profiles create a striking look while leaving the inner space white for user convenience.

LED Lights with Activation Switch: Our lockers can include USB chargers, power outlets, and LED lights with activation sensors that respond to an opened door.

Towel Drop Cabinetry:

Our towel drop cabinetry is a practical addition to any gym, offering a convenient place for members to drop off used towels. Available in corner or end cap designs, these cabinets fit seamlessly into your space while ensuring durability and easy use. They help keep your gym clean and organized, improving the overall experience for your members.

Wallet & Cell Phone Lockers:

Our wallet and cellphone combination lockers are a great addition to any gym. They provide a secure and easy way to store small valuables like keys, phones, and wallets. Built to withstand high traffic use and be user-friendly, these lockers fit perfectly into your gym's existing setup and can be fitted with keyless locks to enhance user convenience.
