We incorporate the best materials and latest features to meet modern requirements of the industry resulting in a bestselling product line. Our versatile construction design allows for a vast choice of sizes and configurations. Our unique extruded aluminum profile allows us to utilize the material in a highly efficient manner. The construction of MVP model uses FOREMAN® vertical aluminum 2-channel profile throughout the full height of the locker for using 1/8" thick solid phenolic for the side and back panels. All other horizontal panels are made out of standard 3/8" (10mm) thick phenolic material secured with stainless steel hardware. This brought an extremely pricey product back down to an affordable level. Typically the lockers ship unassembled leading to significant savings for long distance shipping within the US or even worldwide. Assembling the Lockers does not require a professionally trained staff. The detailed installation manual and instructional video easily demonstrates how the locker are assembled. FOREMAN® lockers are constructed with Stainless Steel flush mounted bolts (Countersunk) so the lockers join together seamlessly.

FEATURES:

FOREMAN® Athletic MVP locker is 24" wide and 72" high. It may have 18" or 24" depth. Currently there are (2) basic configurations of the upper compartment: open cubby or a spilt shelf with a safe and small cubby and (2) configurations for the lower compartment: open cubby or a lockable chest. We also offer an open space for an ice-hockey model.

INCLUDES:

- Modern HÄFELA Hardware
- Standard Aluminum Clothes Bar
- (2) Wall-Mounted Hooks (Hook Options Available).
- Hasps for Pad Lock (On lower compartment when the chest option is selected).
